

NEW PRODUCT ANNOUNCEMENT

Dear Valued Customer,

We are pleased to introduce the **Stellar** line of CEC's LED Halogen retrofit lamps for fog light and off-road vehicle applications*. Delivering a whiter light (6000K) that is up to twice as bright as the minimum standard for OEM halogen bulbs, our Stellar LEDs will help you spot objects faster and from farther away.

Drive with confidence and luxury with the premium white light usually only found on high-end vehicles. You will be noticed by anyone approaching you without blinding them.

Never worry about changing lights again with up to 10 times the life hours of standard halogen bulbs.

*Per US DOT/SAE standards, these are designed for fog lights and off-road vehicles. Check your local legal requirements to ensure the compliance of LED Retrofit light applications.

Thank You,

Jocelyn Lai
CEO, CEC Industries, Ltd

LED CANbus

CANbus adapters are available to prevent false bulb failure warnings. Since LED lamps have a lower wattage and draw less power than conventional bulbs, your vehicle system may fail to detect the LED lamp, triggering a flickering effect. See website for more details.

CEC Products are:
